RV12 Project Log

Date	Hours	No. of students	Job reference
16 th September 2020	12:30-17:00	4	The final touches

A Visit from the Sign Writer

During the week we had a visit from Darren at Coastal Signs to put the registration and yellow stripe on the RV-12. On arrival it was great to see how well it has come up. He will return to apply the RV-12 decal to the tail in the coming days. It's great to see another box ticked and we get close to the end. We are also planning a little tribute for this aircraft as well, but more on that later.

Double Checking Paper Work

Today we have Floyd working through the build manual and double checking everything has been marked off. It is an unenviable task however it has to be done.

Fitting Interior for Weighing

Corbin is working to put the interior trim in so that we can have all parts of the RV-12 fitted. The interior will come out again eventually, but in the meantime it's great to see this RV-12 looking so close to completion.

We Thought We Were Taking a Break

Next week our students are sitting their practice exams therefore we didn't think there would be a build session. However due to the dedication and commitment shown by the students we are back building again next week to try and get ZK-MBB as close to completed as possible. Over the school holiday break our mentors will be carrying out small bits of work and doing the required safety checks.

Let the Pictures do the Talking

Today we have so much going on, however there is very little to write about. So with that in mind enjoy some of our pictures taken today.

See You Next Week!
